Official veterinarians from countries that have committed to the WOAH PVS Pathway, wishing to acquire additional skills and to progress in their functions and responsibilities.

2-4 hours / week (estimated time of work)

Contact and General Organisation:

vincent.brioude@vetagro-sup.fr

michiko.robilot@vetagro-sup.fr

Technical Support (Quality and Management of Veterinary Services):

Patrice Gautier, Official veterinarian (Saint-Malo, France)

Tuition Fees: 880 € (one module)

Need-based scholarships are available, please contact us if you want to apply.

Location:

Online courses + possible face-to-face session at ENSV-FVI, VETAGROSUP, MARCY L'ÉTOILE (LYON, France) depending on additional budget availability.

Registration: [Click here](#)

CONTEXT

e-TRAIN is a new online training initiative designed by ENSV-FVI (as WOAH Collaborating Centre for training of Official Veterinarians) to maximize the various available online training materials (in particular WOAH material) by deploying an ecosystem that facilitates the acquisition of knowledge and skills (through individual projects, group work, webinars, etc.).

“Quality and Management of Veterinary Services”

3 months (January to March 2027). Launching in December 2026.

A certificate will be delivered upon completion of the course.

PROGRAMME

During 3 months (until end of March 2027) and using online tools, develop your international network with worldwide participants and international experts. Share your experiences & challenges to produce useful material linked to your professional objectives and expectations.

Cycle	Module Technical Theme	Current Topic (webinar)	Dates
1	Quality and Management of Veterinary Services	WOAH 8th Strategic Plan	Jan.–Mar. 2027
2	Animal Health Management	Emerging Diseases	2 nd half of 2027
3	Emergency Management	WOAH PREVENT Forum	2028

The proposed “current topic” may serve as the basis for case studies to be prepared in pairs.

Training Objectives:

At the end of the course, the participants will:

- Develop their knowledge and skills necessary to actively participate in the strengthening of Veterinary Services,
- Learn how to better implement WOAH recommendations in their home countries.

The content of the course will be adapted, on a case-by-case basis, to the local situation of the participant's home country and to the strategy designed for that country as a result of the PVS Gap Analysis (*Performance of Veterinary Services*).

Pedagogical Methods:

With e-TRAIN, ENSV-FVI introduces an innovative three-step learning journey with tailored support:

1. Knowledge acquisition through interactive content,
2. Individual tutored projects to embed skills in professional contexts,
3. Collaborative solution-building in pairs, followed by collective presentations.

This modular and collaborative approach empowers each participant to take ownership of their learning while contributing to an international expertise network. By blending autonomy with peer and expert collaboration, e-TRAIN enables participants to immediately apply knowledge to real-world actions and co-develop solutions tailored to global health challenges.

Prerequisites:

An advanced degree in the veterinary sciences, 3 to 5 years of relevant work experience and professional English level are required.
